The Heart of Leadership

領袖才華的初衷

60 Cheng Wai Shing, Wilson

At Hong Wah College, we were exhilarated as a "treasure hunt" where the greatest prizes are character and skill. For Wong Cheng, this journey has culminated in a remarkable "Triple Crown" of recognition being named an Outstanding Student in the Kowloon Region, the Wong Tai Sin District, and by the Hong Yue Club in 2025.

The Courage to Lead
Wilson's leadership was forged in the Students' Association. Driven to match his potential, he and his cabinet successfully campaigned to save the school. Wilson candidly admits that running a student-oriented organization is never a piece of cake, but the challenges of engaging events and overseeing wellbeing brought him the true meaning of resilience and collaboration.

A Vision for the Future
Wilson mentors his peers that while academic results are important, the treasures found in leadership and exploration are what truly enrich one's growth. His story serves as a powerful encouragement for every Hong Wah student to dream boldly and step beyond the framework to find their own unique success.

Quick Facts

The Depth of Intellect

學研思辨的深度

Lee Yiu Sing, Daniel

(2025 Graduate, currently studying in the Science Master Class at the University of Hong Kong)

A Milestone in Mathematical Publication
A significant peak in Daniel's journey is the publication of his book, "Mathematics for International Advanced Level and Bridging to STEP". Released through NoteSty, this work serves as a vital bridge for students transitioning to high-level university mathematics, reflecting his commitment to supporting the next generation of thinkers.

Quick Facts

- Academic Distinctions
- Student of the Year - Winner (Mathematics)
- International Olympiad on Astronomy and Astrophysics - Former 1st Team Representative
- Chinese Physics Olympiad - Semifinal 2nd Runner

Professional Publications

- Mathematics for International Advanced Level and Bridging to STEP
- DSE ICT Mock Examination Set A (NoteSty)

Research & Membership

- Research Member - Prof. Zhang Bing's Group (HKU)
- Member - Hong Kong Academy for Gifted Education (HKAGE)

Leadership and Global Collaboration
Daniel's leadership as the former chairperson of the Science, Physics, and ICT Societies at Hong Wah laid the groundwork for his global reach. His new collaboration with the International Mathematics Olympiad (IMO) team and serves as a problem setter for gifted student programs. Whether organizing colloquia or participating in the MIT Hong Kong Innovation Node ESG Workshop, Daniel focuses on applying specialized knowledge to real-world challenges.

Researching the Frontiers of Science
Currently a member of Professor Zhang Bing's research group, Daniel is delving into **Charged Compact Binary Coalescence**, exploring the mysteries of black holes and information geometry. Grateful for the "relentless pursuit of knowledge" encouraged at Hong Wah, he looks forward to hearing the melodies he will share with the world.

The Strings of Distinction

卓越非凡的弦音

Pong Ho Chun, Jacky

(2025 Graduate, currently studying at HKAPA)

At Hong Wah College, we believe that every student possesses a unique spark. For Jacky, that spark was found in the strings of a guitar. Today, we celebrate his remarkable achievement as the only guitar student admitted to the **Hong Kong Academy for Performing Arts (HKAPA)** since 2019 in testament to his relentless dedication and the vibrant artistic culture of our school.

A Foundation of Support
Jacky's path to his dream school was paved with the care and guidance of the Hong Wah family. He credits his "abiding competitiveness" to the diverse resources provided over the years. From Vice Principal Miss Chan's scholarship recommendations to Mr. Choi's specialized coaching in music theory and interview techniques, Jacky was never alone in his pursuit. Principal Mr. Lui further championed his talent, nominating him for prestigious programs at both the HKAPA and the School Nominations Direct Admission Scheme (SDAS) at CUHK.

Beyond Classical Boundaries
During his time at HWC, Jacky's musical horizons expanded far beyond the classroom. As a member of the Senior Choir, he joined the Parsons Music Exchange Tour in Foshan, China, gaining a global perspective on performance. A particularly transformative moment was a masterclass with Dr. Chan Wing Sang, organized by Principal Lui, which sharpened his technical precision. However, Jacky's most cherished memories are from our Christmas concerts. While he is a classical guitarist at heart, he used these stages to experiment, "blending fingerstyle and Boss Nova arrangements was quite challenging," Jacky shares, "but it truly strengthened my skills comprehensively as a musician."

Staying True to the Music
Jacky's story is one of "distinctive academic advancement" fueled by artistic literacy. As he moves forward into a professional performing arts career, his journey reminds us all to stay true to our aspirations. At Hong Wah, we are proud to have been the stage where Jacky's music first took flight, and we look forward to hearing the melodies he will share with the world.

The Bond of Resilience

師徒同心的毅力

Ms. Kwok Sai Ming, 48 Chow Tin Nok and SC Jiang Yuk Chun

The evolution of Chow Tin Nok and Jiang Yuk Chun from beginners to Hong Kong team athletes is a story of how a teacher's unique vision and tireless commitment can build a student's resilience for life.

I. A Teacher's Vision: From "No" to the Hong Kong team
Neither athlete dreamed of jumping. Ms. Kwok Sai Ming saw their hidden potential.
Chow Tin Nok: A former sprinter, he refused high jump in Form 1. After his first race ended in disaster, he gave it a try. Within a year, he joined the Hong Kong team and won bronze. "Without her invitation, that 'no' of today would not exist."
Jiang Yuk Chun: He hated high jump after being forced to compete in primary school. Bored during the pandemic, he joined Ms. Kwok's evening practices. "I'm not talented, it took me three months to learn the Fosbury Flop." He became someone he once looked up to. "We persevered a few days of effort, but overlook how much we truly transform over the years."

II. More Than a Coach: Mentorship and Personal Growth
Ms. Kwok's impact goes far beyond technical training; she posited her heart into their personal development.
A Safe Space to Grow: Tin Nok highlights the emotional support he received. "Ms. Kwok is both a friend and a teacher. Even when I showed my nervous and childish side, she didn't judge me. Instead, she taught me how to become more mature."
Finding Meaning: Yuk Chun highlights that Ms. Kwok is certainly different from other full-time coaches. She never pressures him to hit specific heights or records but for underperforming. She always told him, "I don't want to train champions. I want to enrich your school life, so that when you look back, you feel happy and grateful for the memories."

III. Breaking Through: From Setbacks to Success
Between 2024 and 2025, both boys faced grueling trials. Yet with perseverance, they found their way back.
Chow Tin Nok: "It was so painful every time I jumped" he nearly retired. Despite the doubt, he notes, "Ms. Kwok never gave up on me." His perseverance finally paid off; he was selected to represent Hong Kong at the 2025 Asian Youth Games.
Jiang Yuk Chun: Hit a plateau where his performance dropped by 10 cm for an entire year. But he refused to give up. Finally, he broke through – achieving a personal best of 1.99m and proving that your greatest level is always just one more "try" away.
